

SASEG Member Survey June/July 2021

Survey Overview

The SASEG management committee has been working for some time to ensure that the Swiss Association of Energy Geoscientists meets the needs and demands of existing members and potential new members. SASEG cannot ignore the changing energy supply and the associated discussion about its consequences (keywords climate change, sustainable forms of energy, etc.). In order to better know and understand the demands and expectations and level of satisfaction, we have reached out to current members with a brief survey.
